

## Introducing: Tube Pendant

Light is the magic ingredient that can really make a space come together. It's why we think so much about it, and spend so many hours working on designs that make full use of what it can bring to a home or workplace.

Our new Tube Pendant does just that. Formed from a solid aluminium tube lined with a simple piece of translucent paper, the top can be adjusted to allow light to diffuse upwards, while the paper can be pulled out slightly to give the edge of the lamp a soft, warm glow. We may not know what your room looks like, but we're pretty sure we can help make it that little bit more special.

Available in two sizes and four colours to fit any space. We'll leave the rest to you.
