

PROPER USAGE AND MAINTENANCE

Proper usage and maintenance is vital for getting the most out of the valuable resources we have. Our designs are made to last for generations, but just like everything else, they need a little care to get there.

OIL TREATED OAK

Origin

Oak grows in most temperate zones. Skagerak oak comes from European forests and is either 100% FSC certified or FSC mix certified, supporting sustainable forest management. The wood is selected carefully by hand to ensure the best and most durable quality in production.

Why

Oak is a sturdy and hardwearing antibacterial wood type. Its light, elegant colour and well-defined grains makes oak a safe choice for high-quality interior

Cleaning and Maintenance

Your new product comes with an oil treatment. For daily cleaning, use a damp cloth firmly wrung and be sure always to wipe the entire surface evenly. We do not recommend the use of cleaning agents for daily cleaning. Spills are to be removed immediately to minimize risk of stains.

Oil treated products are to be retreated 1-2 times per year to keep the protective layer on the surface and maintain the aesthetic qualities from the oil. For future treatment, use a suitable oil treatment and follow the enclosed instructions carefully. Oil treatments can be purchased on Skagerak.dk. Avoid contact with other materials to avoid spots and marks. Always follow the specified safety instructions of the treatment product and use the recommended personal protective equipment.
