

Product Care

To maintain the finish quality of your Mater product, please follow the care and cleaning procedures provided below. The instructions for the care and maintenance are provided to you as a service. No warranty is implied since results may vary.

Wood

Lacquered or stained wood

Lacquered or stained wood offers a stronger surface than oiling and is also effective when coloured surfaces are desired. Compared to natural or oiled wood, lacquered and stained wood is easier to clean and requires very little maintenance.

For daily care it is recommended to dust the furniture with a soft cloth. Lacquered and stained wood can be cleaned with a soft cloth wrung in a mild solution of lukewarm water and a universal cleaning detergent. Always follow the wood grains and always dry with a soft dry cloth immediately after cleaning.

Avoid use of abrasive cleaning agents and aggressive cleaning detergents as this will damage the surface of the lacquered or stained wood. Avoid placing wooden furniture in direct sunlight, excessive heat or humidity.

We always recommend use of trivets under hot objects, such as coffee pots and cups to prevent the lacquer or stain to react to the heat.

Leather

As a natural material, leather requires looking after. If you care for the leather in the right way, it will become even more beautiful over time. Like most natural materials, it does need some care and looking after to ensure its long-lasting appeal year after year, generation after generation.

Only vacuum clean with a soft brush. Never use soap or water otherwise the velvety look and feel will disappear. Do not apply leather grease or soak the leather. Avoid any chemical products, such as saddle soap, other leather cleaners or household products. Protect from direct sunlight, excessive heat and sharp objects.
