

KNIT

DESIGNED BY JIN KURAMOTO

HAY

KNIT

Designed by Japanese designer Jin Kuramoto, Knit is a simple and iconic coat rack with a distinctive sculptural design. Inspired by the tactile experience of touching materials and the experimental processes of bending and knitting ropes and metal rods, Knit is developed from three interconnected metal pipes. The unique three-dimensional structure has a strong aesthetic presence and comes as a flat-pack design. Knit can be used to add functionality and visual interest to hallways, bedrooms and other private or public areas.

Jin Kuramoto is a Japanese designer situated in Tokyo.

INTRODUCING JIN KURAMOTO FOR HAY

Jin Kuramoto is a Japanese designer who was born in 1976. He established JIN KURAMOTO STUDIO INC. in 2008 and designs a wide range of products including furniture, home appliances and everyday items.

[LINK TO VIDEO](#)

He values the process of repeated trial and error, touching materials and prototyping in a studio full of inspiration. His work has won numerous international awards, including the Red Dot Award 'Best of the Best', and the iF Product Design Award. For HAY, Jin Kuramoto has designed Knit.

Jin's design process considered delivery and transportation when developing Knit.

The unique shape of the structure is the feature of the design.

Knit is a simple and iconic coat rack that can be used in a variety of ways.

Jin Kuramoto's design studio in Tokyo, Japan.

The three metal pipes are connected in a three-dimensional way so that they support each other.

Knit has a smart flat-pack design that only uses three bolts to assemble the product.

Jin uses the practical process of creating designs by hand while touching materials, creating Knit when experimenting with bending and knitting ropes and metal rods.

PRODUCT FACT SHEET

KNIT

DESIGN BY JIN KURAMOTO, 2021

Designed by Japanese Jin Kuramoto, Knit is a simple and iconic coat rack with a distinctive sculptural design. Comprising three powder lacquered steel pipes that are interconnected in a three-dimensional way, the pipes are securely 'knitted' together to support each other and create the strength of the body. Inspired by the tactile experience of touching materials and the experimental processes of bending and knitting ropes and metal rods, Knit was developed as an extension of HAY's wardrobe and garment hanging options in a flat-packed design that is easy to assemble. Featuring a high gloss finish that creates a lustrous effect, Knit can be used to add functionality and visual interest to hallways, bedrooms and other private or public areas.

HIGHLIGHTS

- Free-standing coat rack with a simple yet iconic and sculptural design.
- The unique shape of the structure is the feature of the design.
- The three metal pipes are connected in a three-dimensional way so that they support each other.
- Knit has a smart flat-pack design that only uses three bolts to assemble the product.
- Available in different colours and finishes.
- Suitable for a wide variety of private and public environments.

DIMENSIONS

WIDTH 50,5 CM | 19.88"

DEPTH 49,5 CM | 19.49"

HEIGHT 161,5 CM | 63.58"

MATERIALS

PROFILE

Ø30 mm bended powder coated steel
tube legs incl. felt pads.

CONSTRUCTION

Three Ø30 mm bent steel tube legs. Closed with steel caps welded to the tube in both ends. With float drill to attach screws. To be assembled by the customer. Make sure to hang any garments or bags evenly on the hooks to avoid the coat rack from overbalancing.

COUNTRY OF ORIGIN

China

SUSTAINABILITY

HAY focuses on developing long-lasting products that minimise our environmental impact. We optimise the use of sustainable materials such as recycled materials, FSC-certified wood and water-based lacquer, with a growing number of eco-certified products. We have strict regulatory requirements, and the majority of our products are tested to comply with international standards for strength, durability and safety.
