

High Stool, H 69 cm

FSC® certified wood or recycled aluminum

The High Stool is designed by the Danish architect duo Space Copenhagen and is regarded as a *New Danish Classic*. With its organic yet minimalist style, this stool is suitable for both residential and commercial use. The High Stool Collection is made from solid FSC® certified wood or recycled aluminum waste, supporting several of UN's sustainable development goals. Durable for both private and public use.

Mater Sustainability Factsheet

Leather

Leather is a natural material. And at Mater, we believe it will only get more beautiful with age and daily usage. However, like all natural materials, it requires looking after to ensure its long-lasting appeal.

FSC® Certified wood

From the very beginning, we have used FSC-certified wood for all wooden products in our collection. In an FSC® certified forest, no more trees than the forest can reproduce are felled, so the exploitation of nature is avoided.

Find our FSC® Certificate [here](#)

CO₂ Footprint

At Mater, we believe in the importance of transparency. By doing Life Cycle Assessments (LCA) on our furniture, we can analyse the total climate emission for each of our product's lifespan.

Read more about how we measure the CO₂ footprint [here](#)

Aluminum

70% of our aluminum is made from recycled old pipes, tubing and other aluminum waste. It is melted and used in several of our sand-casted products. In this way we transform discarded scraps into beautiful design pieces.

Repair for long lasting

Good products, are made to be used. To give the products the longest possible life, we want to make it easy for you to repair them yourself.
